3 LOCKLAND AVENUE

Wayside Youth & Family Support Network provides a wide variety of mental health counseling and family support services to children, young adults and families in Massachusetts. Davis Square Architects teamed with Wayside on this new group home, the first expansion of their campus in more than a decade.

With additional bedrooms for nine teens and supportive community spaces, the building is located next to Wayside's existing facility, and provides many in-demand program elements on a very tight site. The project also involved close collaboration with City and code officials to navigate challenging security and code requirements, while maintaining a bright and welcoming look and feel.

A proud milestone in our continued partnership with Wayside, 3 Lockland Avenue supports their mission-driven impact in sustainable growth and change for kids and families by providing a safe, comfortable space to call home. ■
