

TEACH PLUS

Teach Plus is a nationwide organization that seeks to help urban schools retain and develop strong teachers who improve student achievement. Working together with the client and the building owner, Davis Square Architects designed a jazzy and functional interior for their Boston office located in the historic Fort Point Channel neighborhood.

Teach Plus boasts an open floor plan and light-filled spaces. The design takes advantage of the industrial character of the building while adding modern elements such as an aluminum garage door in the conference room, sophisticated lighting, a modern palette of colors, and open meeting spaces designed for maximum flexibility. ■
