

WORKABLE

Simplifying the hiring and recruiting process, Workable is an affordable, usable hiring software. When this vibrant company sought to relocate to Boston on a very tight schedule, they worked closely with Davis Square Architects, the general contractor and the furniture provider to determine a functional and flexible layout for a new space reflective of the company's growth. Incorporating a bright, vivid color palette and modern finishes with the historic masonry and heavy timber building, the design team crafted a space that reflects Workable's open, collaborative culture and bold aesthetic while meeting budget, schedule and design requirements. ■
