

THE YACOBIAN GROUP

The Yacopian Group is a retail branding consultant that teams with corporations of all sizes to create meaningful experiences in their retail settings. Their offices were designed to reflect their dedication to perception, transparency, and team solutions. This was achieved through the creation of a "story wall" corridor to both showcase the company's successes and methods, and bring clients into the heart of the organization. With bold colors and lighting, the reception area, experience room, and meeting/work areas mirror the company's collaborative branding methodology while setting the tone for the space. We were also the interior designer for the project and worked seamlessly with the

project architect, project management team, and contractor to create a finished product on a tight schedule. ■
